Protecting the Environment

Protecting the environment means taking care of the Earth so plants, animals, and people can live safely. We can do this by recycling, saving water, planting trees, and keeping our neighborhoods clean. Animals need clean air, water, and forests to survive, and humans depend on nature for food, water, and fresh air.

Even small actions, like turning off lights when not needed or picking up trash, can make a big difference. If everyone helps, we can keep the Earth healthy and beautiful for many years.

Circle the best answer

1-What does protecting the environment mean?

- a) Taking care of the Earth
- b) Building more factories
- c) Throwing trash anywhere

2-Which of these is a way to help the environment?

- a) Recycling and planting trees
